Appl. No. 10/604,144 Amdt. dated November 30, 2004

## Amendments to the Claims

This listing of claims replaces all prior versions, and listings, of claims in the application.

## Claims 1-17. (canceled)

- 18. (original) A circular saw blade, comprising a planar saw body having an axial thickness no greater than 0.080 inches and defining a plurality of cavities therein, each one of said cavities being sufficient to receive liquid therein for transport.
- 19. (original) The circular saw blade of claim 18, wherein each one of said cavities is triangular in cross-section.
- 20. (original) The circular saw blade of claim 18, wherein each one of said cavities has a triangular cross-section, a trailing edge of which is oriented at negative 5 degrees to a radius of the saw body.
- 21. (currently amended) The circular saw blade of claim 18, wherein wherein each one of said cavities includes a radial dimension greater than 0.015 inches sufficient to receive liquid therein for transport.
- 22. (original) The circular saw blade of claim 18, wherein each one of said cavities extends through said saw body from a first side thereof to a second, opposite side thereof.
- 23. (original) The circular saw blade of claim 18, wherein said plurality of cavities comprise three cavities spaced 120 degrees to one another about a center of said saw body.
- 24. (original) The circular saw blade of claim 18, wherein each one of said cavities includes a radial dimension that varies along a circumferential direction of said saw body between opposed circumferential ends of said cavity.
- (original) The circular saw blade of claim 18, wherein each one of said cavities includes corners all of which are rounded
